PROFESSIONAL SUMMARY

Cybersecurity and IT Specialist with hands-on experience supporting enterprise infrastructure within Tekfen Construction in an industrial environment associated with Saudi Aramco projects. Experienced in Windows administration, infrastructure support, network operations, cybersecurity laboratory development, troubleshooting, and secure enterprise environments. Currently advancing expertise through CompTIA Security+ and PMP studies while building enterprise-scale cybersecurity laboratories, defensive tooling, and security-focused software projects on GitHub.

PROFESSIONAL EXPERIENCE

IT Specialist Tekfen Construction Jeddah, Saudi Arabia	2025–Present
- Support enterprise IT infrastructure across large industrial and construction environments. - Provide technical support for users, systems, and enterprise applications. - Assist with infrastructure security and compliance practices aligned with project requirements. - Troubleshoot Windows, networking, hardware, and connectivity issues. - Participate in secure IT operations supporting Saudi Aramco project environments.	
Guest Care Center Saudi Airlines (SV) Jeddah, Saudi Arabia	2024–2025
- Provided guest support in a fast-paced, customer-focused airline operations environment. - Maintained service efficiency, professionalism, and clear communication while resolving guest requests.	
Web Application Administrator MTA Events Jeddah, Saudi Arabia	2021–2024
- Managed and maintained web applications tailored to operational and industrial use. - Applied data-security controls and supported reliable application administration.	

SELECTED TECHNICAL PROJECTS

Enterprise Cybersecurity Lab Designed and developed an enterprise-style cybersecurity laboratory using VMware, Windows Server, Active Directory, Kali Linux, Ubuntu, and Security Onion for identity services, network defense, security monitoring, log analysis, and attack-and-defense learning. github.com/MuhanadGhurab/enterprise-cybersecurity-lab	
SecSky / SecureSkies Drone Security Project Second Place — University Graduation Project Cybersecurity-focused graduation project centered on secure drone communications concepts, data integrity, and resilient architecture for hostile or unreliable environments. Public historical portfolio documents a partially integrated prototype. github.com/MuhanadGhurab/secureskies-drone-security	
Crow Ecosystem Platform Multi-tenant enterprise platform portfolio focused on secure identity, tenant isolation, governance, enterprise workflows, and resilient platform operations. github.com/MuhanadGhurab/crow-ecosystem-platform	

TECHNICAL SKILLS

Cybersecurity: Security Operations, Security Monitoring, Network Security, Security Hardening, Risk Assessment, Incident Response Fundamentals
Infrastructure: Windows Server, Active Directory, Linux, VMware, DNS, DHCP, Enterprise Technical Support
Security Tools: Security Onion, Kali Linux, Wireshark, Nmap, Git, GitHub
Development: Python, Java, JavaScript, TypeScript, React, Next.js, PostgreSQL
Networking: TCP/IP, Network Segmentation, Firewall Administration, Network Diagnostics

EDUCATION AND ACHIEVEMENT

Bachelor of Computer Science / IT — Cybersecurity Jeddah International College 2024 Achievement: Second Place — University Graduation Project
--

PROFESSIONAL DEVELOPMENT

CompTIA Security+ — In Progress
Project Management Professional (PMP) — In Progress
